Full ATS Report — Sample Candidate

Target role: Operations Manager · Setting: Corporate & Business · Résumé scanned against the employer's keyword set

The headline

Free instant scan score: **61 / 100**. This résumé is not weak — it is *unreadable to the machine*. Two parse-level problems (a missing standard section header and almost no quantified results) are filtering it out before a human ever sees it. Both are fixable in one rebuild, and this report shows exactly how.

The 8 checks — full results

Check	Result	What it means
Contact info	Pass	Email and phone found and parseable.
Length	Pass — 612 words	Inside the healthy 1–2 page band.
Action verbs	Weak — 9 found	Too many duties described with nouns; verbs are what parsers and recruiters scan for.
Quantified results	Fail — 2 numbers	Only 2 figures in the whole document. The single biggest fixable gap.
Keyword match	Weak — 41% overlap	Missing 9 of the employer's stated terms, incl. 'process improvement' and 'vendor management'.
Red-flag phrases	3 found	'Responsible for' ×2 and 'team player' — clichés that cost ranking and credibility.
Clear sections	Fail — 1 header missing	'Experience' is titled 'Work History'; several ATS parsers will not file it correctly.
Bullet formatting	Pass	Real bullet lines throughout — parsing-safe.

Priority fixes, in order

1. Rename 'Work History' to 'Experience' — one word that repairs parsing. 2. Quantify the six strongest bullets (rebuild below; facts only, nothing invented). 3. Weave in the 9 missing employer keywords where truthfully earned.
4. Replace the 3 red-flag phrases with verb-led statements.

Rebuild excerpt — before → after

Original bullet	Rebuilt bullet
Responsible for managing vendor relationships.	Managed 14 vendor contracts ($1.2M annual spend); renegotiated 3 agreements, cutting costs 11%.
Helped improve processes in the warehouse.	Led a process-improvement project that cut warehouse pick errors 23% in one quarter.
Team player who handled scheduling for the department.	Built weekly schedules for a 22-person department; held overtime to 4% under budget.

What the paid deliverable contains

The full report (with rebuild) contains: all 8 check results with evidence, the complete keyword-gap list for your target role, the priority fix list, and a full rebuilt résumé for your target setting — every number drawn from your own document, never invented. Honest limit, stated on the free checker too: this is a heuristic checklist scan, not AI parsing; it cannot judge content quality or fit. Defective file or wrong document? We regenerate it free — or refund you.
